

**Dan Dumitru**, *On the connectedness properties of the attractors of iterated function systems*

**Abstract:** This paper is a survey and treats some of the topological properties of the attractors of iterated function systems (finite and infinite) such as connectedness, arcwise connectedness, locally arcwise connectedness and other properties of this type.

**Keywords:** attractors, iterated function systems, connectedness, arcwise connectedness.

**MSC 2010 Classification:** 28A80.
